

European Academy of English for Health Professionals

in partnership with

University of Malta

Intensive English Course for Radiographers

WHAT?

Intensive English Course for Radiographers

WHERE?

University of Malta, Malta

WHEN?

30th January – 3rd February, 2023

OVERVIEW

The course provides health professionals with a deeper understanding and knowledge of English and helps improve technical vocabulary related to their professional fields. Our principal goal is to help healthcare professionals to communicate effectively and accurately through English in their working lives. Additionally, the course aims to help professionals develop skills in writing scientific abstracts and delivering conference presentations.

TARGET

The course is aimed at practicing or student radiographers who may have English-speaking patients; who wish to participate in international conferences; and who are considering submitting abstracts for conference presentations in English.

PRINCIPAL COURSE CONTENT

- Medical terminology (including profession-specific terminology)
- Patient communication
- Public speaking, presentation skills and preparing for conference presentation
- Interactive practical workshops with a professional focus

OBJECTIVES

Participants will develop their capacity to:

- use English with confidence in the workplace
- hold conversations with international colleagues
- engage with published research related to their profession
- give presentations and actively participate in conferences
- use technical vocabulary specific to their field

APPROACH

This intensive course is highly interactive. Participants will develop specific language areas through small group activities, role play, and by using medical equipment specific to their profession. Classes are student focused and will have a maximum of 12 participants. Radiography participants will experience dedicated sessions focused on their specific profession.

COURSE FEES

The cost includes all classes, interactive lessons, and hands-on practical sessions.

Radiographers course fee: 800,00 €

Radiographers course fee (for students and unemployed*): 550,00 €

ACCOMMODATION

The following accommodation options are available:

Sunday 29th January – Saturday 4th February

Private single room: 250 €

Shared 2 person room: 200 €

All the selected accommodation and services are subject to availability and early bookings are recommended.

** The EAEHP Administrative team will undertake checks as required to establish whether EAEHP students are currently undertaking undergraduate studies or on their employment status. Any false declarations with regard to registration categories listed above will result in certificates of completion being withheld and a request for the fee balance to be paid.*

Bank AIB - Swift Code: AIBKIE2D - IBAN: IE80AIBK93015627136068

IMPORTANT: PLEASE MAKE SURE TO INCLUDE THE NAME OF THE STUDENT IN THE "REASON FOR PAYMENT" FIELD. A deposit of €250 is required following submission of the Application Form.

Balance to be paid by Monday 16th January, 2023

Course content themes:

- 1. *Technical language for Radiographers;***
- 2. *Communication with patients in English;***
- 3. *Preparing for conference presentations.***

Technical language for Radiographers:

Dedicated sessions will be provided which will cover the key terminology used in general radiography and imaging specialities such as CT, MRI and Nuclear Medicine. Moreover, we deliver sessions about radiotherapy, the radiography profession in Europe and radiation safety regulations. There will also be a radiographic image viewing sessions focusing on image critique, radiographic anatomy and pathology. A published peer-reviewed journal article will be reviewed in order to familiarise participants with the language used. A glossary of key terminology used will be provided for all participants along with associated activities.

Communication with patients in English:

Practical role-play scenarios for radiographers will be conducted in the clinical skills laboratories at the University of Malta. Participants will interact, discuss and formulate questions that are directed at patients, use terminology related to the associated area of expertise, how best to explain something to patients, and use terminology related to equipment specific for radiography.

Preparing for conference presentations:

This will start with the first stage of presenting at a scientific conference i.e. submission of an abstract. A scientific abstract related to your area of expertise will be reviewed and discussed in small groups and a presentation delivered on this topic followed by questions and answers. Presentation skills will be covered throughout the course through sessions exploring presentation structure, useful phrases, and linking sections. Sample videos of good and bad scientific presentations will be reviewed in class. Participants will be required to give an informal initial presentation followed by a short, formal scientific presentation at the end of the course.

Other Course features:

- Sessions will be delivered by a number of expert Radiography lecturers together with experienced English language lecturers. The main feature of this course is to offer classes for radiographers taught by radiographers;
- A clinical visit at the local General Hospital;
- Accommodation can be provided for 6 nights in self-catering apartments close to the University;
- Certificate of completion will be presented to all participants at the end of the course;
- Social and cultural activities will be organised during the course for interested participants.
